

# CHILLED CONSOLIDATED CONTAINER / EUROPE

## Chilled product by air freight too expensive? Can't fill a whole reefer container?

**At Go Logistics we've solved another big freighting issue! We have created a consolidated chilled container service into New Zealand from Europe where shared costs mean a competitive way of importing chilled product.**

If you only have 2 or 3 pallets of chilled product to import from Europe historically you're stuck having to choose between expensive freight options or forget the idea completely. Now you can utilise our chilled consolidation service at a cost that makes this quantity viable.

- Through the Go Logistics hub in Hamburg we receive chilled orders from throughout Europe, consolidate them and ship them to our warehouse in Auckland, where they are distributed to you
- All shipments are trackable
- Convenient door to door service
- Customs and MPI approved to handle food
- One single point of contact for the entire process
- A cost effective SME focused freight product to open new opportunities.
